Software engineer building production React and TypeScript interfaces, plus agent tooling (MCP, Claude). Shipping healthcare operations UI at Zensar, and a live gym product with an MCP API.

Experience

Software Engineer, Zensar Technologies
Oct 2026 – Present, Pune, India
Junior Software Engineer, Oct 2025 – Sep 2026

- Ship React and TypeScript features in an Nx micro-frontend monorepo for enterprise task lifecycle: create, edit, reassign, cancel, and close, with shared validation and table patterns.
- Delivered clinical observation and nursing-request UI (Form.io): shift administration, patient details on logs, attendant and manager views, and screens matched to Figma on desktop, iPhone, and iPad.
- Closed 37 of 44 assigned user stories and resolved 57 UI defects in Azure DevOps through Sep 2026 (filters, time zones, device layout) on an Agile release cadence.
- Added a semibold type style to the shared design system, and built a Figma design-system sync agent for an internal AI summit.

Mobile App Developer, Freelance, Myotrek
Feb 2025 – Jun 2025, Pune, India

- Set up Firebase Authentication and Firestore sync for a React Native (Expo) home-gym app so login and workout data stay available across devices.
- Owned Expo EAS builds and release. The app is live on the Apple App Store.

Software Developer Intern, XpedioLive Technologies Pvt. Ltd.
Feb 2024 – Apr 2024, Pune, India

- Built customer-facing pages and REST API integrations with Node.js and SvelteKit, aligned to product workflow and customer needs.
- Implemented Axios client and server data flows, and wrote test cases around request and response paths.

Projects

Liftw, 2025 – Present, liftw.xyz
Next.js, TypeScript, Prisma, PostgreSQL, MCP, Cloudflare Workers

- Shipped a production gym tracker (auth, workout logs, progress analytics, exercise knowledge base) on Next.js, Prisma, and Postgres (Vercel and Neon).
- Built an MCP server on Cloudflare Workers (training summary, coach brief, list and publish insights) with API-key auth, so agents coach from live training history instead of a demo chat UI.

PersonAI, Apr 2025 – Jul 2025
Express, TypeScript, MongoDB, Gemini API, JWT, React

- Built a second-brain app for articles, videos, and notes, with JWT-secured REST APIs and per-user data isolation.
- Used Gemini (gemini-2.5-flash) to write a short summary when content is saved.

Skills

GenAI / LLM: Prompt engineering, tool use, MCP, agent workflows, offline inference (llama.cpp, Ollama), Claude, Gemini API, OpenAI API
RAG and agents: LangChain, LangGraph, vector embeddings, Qdrant, semantic retrieval, Mem0
Languages: TypeScript, JavaScript, Python, Go, SQL, HTML, CSS
Frontend: React, Next.js, React Native, Expo, Tailwind CSS, shadcn/ui, SvelteKit, Figma
Backend: Node.js, Express, FastAPI, REST, JWT, Zod, Firebase Authentication, Firestore, Axios
Data and infra: PostgreSQL, Prisma, MongoDB, Docker, Nx, Cloudflare Workers, Vercel, Neon, Azure DevOps, Git

Education

AISSMS College of Engineering, Pune, India
B.E. Computer Engineering, 2021 – 2025, aggregate 75.55%

Certification

Claude Certified Architect – Foundations (CCA-F), Anthropic, Jun 2026 – Dec 2026
Credential h5phb8iwbwrw
